The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hawkins et al.

Hawkins et al disclose formation of CCD image sensor including silicon nitride 16/silicon oxide 14 gate dielectric 20 and implantation through gate dielectric 20 to form regions 32.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hawkins et al as applied to claim 1 above, and further in view of the following comments.

Hawkins et al does not disclose forming nitride layer 16 by LPCVD or the recited thickness range of nitride layer. The examiner takes official notice that formation of silicon nitride by LPCVD was known prior to applicant's invention. It would have been within the scope of one of ordinary skill in the art to combine the known process with that of Hawkins et al to enable formation of nitride layer 16.

One of ordinary skill in the art would have been motivated to arrive at applicant's recited thickness of the nitride film through routine experimentation to achieve desired device properties and desired device dimensions and associated device densities on the finished wafer.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group Receptionist whose telephone number is (703) 308-0956. See MPEP 203.08.
